

Washington State: Longest Commutes to Work by County

Percent of Population With 90 Minute Commute or Longer

Lightest Pink	Light Blue	Lightest Blue	≤ 0.01319
Light Orange	Medium Blue	Medium Light Blue	≤ 0.02237
Orange	Dark Blue	Dark Light Blue	≤ 0.03394
Dark Orange	Very Dark Blue	Very Dark Light Blue	≤ 0.04822
Dark Red	Black	Very Dark Black	≤ 0.07350

0 25 50 100 Miles

These small multiples display the percentage of people in each county of Washington State who commute to work 90 minutes or longer each way. The data displayed in each small multiple is the same, but the color scheme for each is different. The upper-left map uses a red color scheme, which carries a negative connotation for long commutes. The upper-right map uses a blue color scheme which has the opposite effect of the upper-left map. The lower-left map has a green color scheme, which is more reminiscent of forested land-cover or some other data set. I used only scaled color schemes because divergent color schemes were too complicated for this data set.
